Attachment to Arizona Corporation Commission Public Comment Form

The EVP Curtailment Plan:

1. This plan is invalid because it was not included in any public notice.
2. The criteria for determining if a person is in violation of the curtailment requirements are unfair and unreasonable. Our average water bill (based on 20 years in EVP) is \$21.00 to \$22.00. We do everything possible to conserve water. Last year we lost 2 established trees due to not watering them. We have not had a vegetable garden for 3 years. It would be impossible for us to cut back 20%, 30% without having to vacate our property.

Other complaints:

3. If PWC had made improvements to the water system, it probably would not be necessary to haul in water. In the past, we have reported obvious leaks and it is days before any repair is done.
4. The large proposed increase in base fees and water costs places an unfair hardship on those of us on fixed incomes.
5. Why should we have to assume penalties when we have done our part in adhering to the water stages and others continue to abuse them?
